mixcraft studio is a powerful music production and multi-track recording workstation with thousands of music loops and dozens of audio effects and virtual instruments. record audio, arrange loops, remix tracks, score and edit video, and mix and master tracks to create polished, professional compositions. take to the stage with automatically synced, non-stop audio and midi clip grooves using the amazingly flexible new performance panel, the perfect partner for live performances. turn your computer into a fully-stocked professional music production center, live or in the studio! unleash your creativity with unlimited tracks, sounds, effects, and virtual instruments! effortlessly adjust clips and digital audio to suit your compositions with the most powerful, best sounding time-stretching and pitch-shifting technology available. turn any performance into a professional production with the best midi sequencer in the industry. the reason why i give this daw only 2 stars is because of the

dreadful definition, colors and scale of its interface. its tools are good to use but i can't believe how they haven't improved the definition of the graphics considering the current 4k monitors. compared to fl studio for example, its graphics are wonderful and it is a pleasure to use and create in a daw with a clean and colorful image. mixcraft 10 should be released soon, a complete new color and design polish should be released this time, or mixcraft will never have a chance to make it to the professional daw market again. listen to the users. mixcraft pro studio is a powerful music production and multi-track recording workstation with thousands of music loops and dozens of audio effects and virtual instruments. record audio, arrange loops, remix tracks, score and edit video, and mix and master tracks to create polished, professional compositions. take to the stage with automatically synced, non-stop audio and midi clip grooves using the amazingly flexible new performance panel, the perfect partner for live
