the AutoCAD command line interface (CLI) or the AutoCAD SDK (Software Development Kit) with which the AutoCAD Add-in wizards are created. In the AutoCAD 2007 and later products, the AutoCAD CLI is installed alongside the application and can be used independently of it, allowing applications to be created as add-ins or command line programs. In 2007 and later versions of AutoCAD, the command line interface is not installed on all machines and requires registry keys to be set to enable its use, but this is not a requirement for the earlier versions. In the past, the AutoCAD add-in was a 32-bit Windows application. The .NET-based API was introduced in the AutoCAD 2010 release, which only works with the 64-bit version of the AutoCAD application. AutoCAD provides a standard scripting language called AutoLISP. Originally intended as a programming language for AutoCAD add-ins, its syntax has been expanded to include standard scripting functions, and is now supported by the stand-alone command line interface.
