There are a variety of resolutions available to you, and using the Information panel, you can create a custom one from scratch or choose one from the list of available presets. These are the same sorts of resolutions that you'll see in the Adjustments panel. You can resize any layer, adjust clipping and self-coverage. The Colors panel offers a ton of options. Choosing a color family automatically chooses the app's standard color range; others are individually color tunable. The app does offer color wheels, but these give you the opportunity to individually pick out every single color in the color family on the screen. This is a highly powerful app, but finding all its features can be a bit confusing. But, as we said, that's what the base app was built for. There's also a built-in Help panel, which provides access to additional help articles as well as to the app's main developer and Adobe support pages. There's even a link to an online training page that we found helpful. The image display keeps the original file in an external memory card. This is great for mobile use, as well as back-up and flash storage. The organization panel is one of our favorites. When you can't see all your images, it can be a bit distracting, and the information flipbook is just well-designed. But the best thing about it is the ability to tap on the section you want. It provides instant access to any image you've added. There's even a helpful flyout menu that allows you to see all images in a stack, which is superb for mobile use.

To recreate a print, whether it's on paper or a wall, the first step is to make sure your layout and assets will make the mark. But while print media like brochures and posters are analog in nature, the digital experiences we create and share are inherently digital. Our goal is to democratize creativity and bring the same professional tools to every creative, for free. The Eurekast workflow is designed to be fast, easy, and to get you valuable results quickly. It does this by swiping between creative modes, like landscapes and layouts with one hand while masterfully creating a stunning piece of art with the other.
