Dv Studio 3.1 E-se

davinci resolve studio provides an extensive suite of editing features to help you create a powerful and detailed master. your results are highly detailed with multiple virtual reference views and a new interface that allows you to mix multiple audio and video tracks at once. the new advanced audio coding (aac) and dolby digital plus (dts-hd master audio) codecs support up to 24-bit resolution and dolby truehd and dts-hd master audio for 3d and 5.1 surround sound. pitch correction, the industry standard for pitch-shifting, is also completely integrated into studio one 5. with a click of a button, you can change the pitch of an entire track, or just a selected audio region. and for that one last touch, undoing the last pitch-correction step is just as easy. use the monophonic re-pitch function to slow down or speed up an audio region, saving you precious time when experimenting with different instrumentation, multitrack drums, or vocals. with the multi-channel view, you can see all the information at a glance, quickly switch between audio and midi channels, and change patch locations instantly. the midi channel function lets you change the midi channel of any selected track, even if youre using midi-in to record a performance. you can even change the midi channel on-the-fly, and immediately see the effects in the midi channels panel. midi-out lets you take your audio performance directly to a live performance application like cubase, reaper, or logic, and you can even record your midi performance using your midi keyboard. add a midi track to a studio one 5 project and youre ready to go. 5ec8ef588b
