“For EA SPORTS FIFA, it’s a huge honour to integrate 22 real football players into FIFA. For us, it’s a dream come true. At last, we can offer the ultimate in detail, authenticity and realism in football,” said Patrick Söderlund, Executive Vice President of Marketing, EA SPORTS. FIFA 22 also introduces new “in-game features” that were inspired by the scientific advances made in medical research. These include a new “Exosuit” system. The Exosuit helps players recover from high-intensity sprints, and enables players to perform more efficient quick turn-ins. “FIFA and EA SPORTS have always been pioneers in the progression of video games. With FIFA 22 we’re taking the next step in developing the game for the people. We wanted to create FIFA that players can be more in control of,” said Jamie Morris, FIFA Global Brand Director. For the first time in an EA SPORTS FIFA game, users will be able to read the action behind the play and interact with the game world directly. FIFA 22 will include many of the new player controls introduced in last year’s “Most Improved Player” Edition. For the last five years FIFA has challenged players to control the ball using both hands, but with FIFA 22, when passing the ball a player must control it with both hands and place it accurately through a screen. Players can also now make timed centre-backs and defenders slide tackles. FIFA 22 introduces a new “virtual assistant” that will support players through the game. FIFA’s new “crowd intelligence engine” will support users in creating a personalised game experience. Crowd intelligence is also the first EA SPORTS FIFA game to incorporate the artificial intelligence “A.I. Path Finder” that simulates a player’s possible options when being played through by a defender and taking a pass. FIFA 22 introduces a new “courage-based gameplay engine” and a new “Journey” system that allows users to actively progress through the game. In Journey, players need to keep a physical and mental momentum in the game and make the best use of the tools at their disposal. “Journey is like a virtual coach that will help players to become more aware of the game they are playing. Features Key:

- 10 New Ways to Play: In FIFA 22, you can choose to control the ball with your every move. Take on opponents using more tools, including new Run abilities. In addition, the new Player and Skills system puts the players in your hands.
- Start Your Climb: The most compelling mode in FIFA, from FIFA 17, returns as a new dynamic Difficulty Selection System. Every game now begins on a different difficulty, each with its own feel and play style. Your Challenge rating and Career Mode win odds now accurately reflect the new Difficulty Selection System, with lower-rated players at a greater disadvantage.
- Play the Entire Game, or Pick Your Team: Every player and goalkeeper you can ever dream of is at your beck and call. If you’re inspired by Brazilian flair or intrigued by Scandinavia, then experience all that football has to offer in FIFA22. In addition, you can now play a complete game as either the manager or player, taking on any opponent.
- Completely Fresh Chemistry: With gameplay inspired by FIFA 17, we made new moves to retain the signature fluidity and finesse of the series. We looked to smaller details to improve each players’ individuality in addition to making each team feel distinct as they mash, press, trap, dribble, drive, kick and shoot.
- Paying Tribute: For the first time in FIFA history, players and clubs are named after real life achievements and rewards, such as the Phillipe Coutinho Award or the Professional Footballers’ Association Player of the Year Award.
- Legends All-Stars: For the first time in a FIFA game, play as some of the world’s greatest footballers. Go toe-to-toe with Brazilian champions Pele and Garrincha. Challenge the five-time world champions Ronaldo, Zinedine Zidane, George Best and Diego Maradona and earn the opportunity to play as Pele in Your Player Career.
- Pass, Shoot, Defend: Take on the game as you never have before. The new Control Stick system allows you to use two buttons at once to attack, defend or fling the ball. Plus, spot a player running down the wing by swiping the ball forward with both sticks, or defending by charging into an attacker or sprinting out of the back in just a few simple taps of your sticks.
- Send a Teammate on a Mission: The new Squad Pos
