What's New In?

MatchUp is a powerful utility that can be used to control the structure of a database and remove duplicates. It will work with any files or databases regardless of their extension. All available metadata about the structure and content of the files/database is displayed in convenient view windows. MatchUp is able to merge databases, create new files and change the structure of an existing file. It is also possible to merge two databases at the same time. The user interface is very intuitive and simple to use. Advantages of MatchUp: • MatchUp supports any types of databases and any file types. For example, you can work with Microsoft Access/Excel/GPS, HTML, Text, HTML, CSV and even MySQL databases. All databases are taken into account, when required. The application supports UTF-8 encoding. • MatchUp supports any number of files at once. The minimum number of files supported is 2. The maximum number of files that you can process is 512. • The minimum number of databases supported is 2. The maximum number of databases that you can process is 512. • All available metadata about each file/database is displayed in convenient view windows. You can change the structure of a file or database. • All duplicates are removed. The program supports the merge feature, which allows the user to merge two databases at the same time and choose which duplicate to keep or drop. • MatchUp can be run from a USB flash drive. • You can change the structure of a database and reorganize the database files. You can move any file from one database to another, change the length of a field, change the structure of a table and even rename a table. • MatchUp supports Batch processing. • You can work with any file type, regardless of its extension. MatchUp is able to process text files and even works with RTF (Rich Text Format) files. • MatchUp is very light on system resources. • It is extremely easy to use. • The application can be completely automated. • MatchUp is able to process any amount of files in parallel, so the

application provides high performance and efficiency in batch processing. • Both the database and data files can be modified at the same time. • You can change the data size by specifying the number of characters, number of decimal places, number of bytes, or kilobytes. • The Unicode multilingual interface supports all languages, including Russian, Czech, Estonian,
