rar and zip free downloadq:
creating own application using ui-
builder i wanted to create my own
application using ui-builder 2.0.0 i
am following tutorial [https://raw.git
hubusercontent.com/jbmsys/jbmsy
s/master/usermanual/ui-
builder/tutorial/apps.html](https://raw.githubusercontent.com/jbmsys/jbmsys/master/usermanual/ui-builder/tutorial/apps.html) i ran the
command `java -jar uibuilder.jar -c
my_project/ -b my_app/ -f uibuilder-
project.xml` the uibuilder says
application deployed successfully i
went to browser window to see my
app but its not getting displayed a:

you need to launch your app like
this: `java -jar uibuilder.xml -d
my_app/dist/my_app.war` -d is for
the directory where your war is
located. since you are launching it
from the command line, you don't
need to specify the -f command
line option to actually run your
application. 5ec8ef588b
