data driven business process management (bdpm) is a set of processes based on the data that can be performed by the business in an automated manner. the bdpm also includes the use of artificial intelligence, and other forms of machine learning and analytics, to provide the automated process of tasks that require human interaction [ 25 26 ]. this process helps business to cut down costs, improve revenue, and increase productivity [ 27 ]. in this book we will explain the concept of bdpm and also will analyze in detail the different tools and techniques available in this domain. business statistics is a three-volume e-book series

---

published by bernd h. pichler and brian n. stoddart. statistics is a mathematical science that investigates the world of phenomena that occur in nature and how those phenomena can be analyzed to make generalizations about them. business statistics creates a bridge between qualitative and quantitative concepts to give the reader a more complete understanding of business and helps the reader analyze the information and process it. by utilizing conceptual content offered in business statistics, readers will have a better understanding of relevant content and its relationships to the industry and business sectors. additionally, students may use this information for their final-exam preparation. business statistics is particularly beneficial for students who aim to be accountants, auditors, or other specialists in the field of accounting and the related disciplines such as business administration and finance. these subjects are based on the quantitative analysis of business problems. business statistics also covers the basics of mathematics, which is the main tool

---

used by business professionals to perform their work.

statistics in business helps you to analyze data gathered in a business, and thus to make data-driven decisions. prof. s.d. sharma and meenu arora tandon have made a significant effort to use interesting examples to illustrate a clear understanding of the statistical concepts. the book provides a comprehensive understanding of the concepts of statistics used for decision-making. it has thorough coverage of topics on descriptive and inferential statistics. the book has only the questions of last year lucknow university examinations included, so every question is solved in the book with fully worked examples. this book helps students clear all the concept in their final examinations. the topics covered in this book are same as in the final examinations of the students and thus students can have an idea about their examination studies. overall, the book is well-balanced, yet

---

solidly structured. it contains all the topics which could form the basis for an undergraduate statistical course in general, and a foundation course in data analysis for business students. the chapter on inferential statistics is done in such a way as to begin to make inferences based on the data, then to move on to make causal inferences, then to allow more complex statistical techniques to be used. business statistics is the main part of a firm's financial statistics. it's an essential part of any organization and must be an important aspect of business. it is not just the accumulation of data about a company's performance, but also an organization's ability to analyze and utilize those data. business statistics gives a firm an opportunity to learn about the data collected and analyzed, and to make intelligent business decisions. 5ec8ef588b
