So the Democrats are trying to pressure the Republicans to create the case. The thing about impeachment is

that you need a legal case. Usually there is a way to construct such a case. There is no case against Trump. The Democrats are trying to construct a case, but to get the evidence of the case they need witnesses who can testify about what happened. The case is the facts of what Trump did or did not do in an effort to get a hold of Ukraine.

So far, the Democrats have gotten one witness, Ambassador William Taylor, who has provided damning evidence against Trump. He testified that Ukrainian President Volodymyr Zelensky pressed Trump to investigate Biden and Burisma and that Zelensky “was very clear that he did not want to work with Mr. Giuliani.” Taylor said Trump eventually gave Zelensky a desk with a phone on it, but, according to Taylor, nobody could talk to him. He said he wrote a note to the NSC saying, “We all know what is going on.” But what did the NSC do to help with the call? That’s what the Democrats want to ask people like Mike Pompeo and Rick Perry. They want to find out if they were involved in it. But how do you use a phone and note to get a hold of a foreign leader who won’t speak with you? Democrats want, as one of their witnesses, Lt. Col. Alexander Vindman, who was on the call. Vindman was on the NSC staff at the time, but his testimony will be limited to his knowledge of the process leading up to the call. The Democrats will not get much out of him. Another witness, David

If your desktop computer requires high-end graphics for optimum performance, you should consider installing one of the many high-end GPU upgrades available. For example, a graphics card with a GeForce GTX 980 Ti enables you to game on your PC at 1080p/60fps, or rather, play at the same resolution and resolution rate at up to 4K. Such advanced features, in addition to the enhanced performance of the high-performance graphics cards, are found only with GeForce GTX GPUs. So, if you want to improve your gaming experience with the latest games or rewatch your favorite movies or TV series on Netflix, then you should invest in a GeForce GTX graphics card. GeForce GTX Graphics Cards are Available in Different Form-factors Every graphics card is available in two different form-factors or designs, depending on your gaming needs. SINGLE-SLOT a single slot design with just one video card. 2+SLOT Multiple video card design (2+) with one main video card and 1-2 video cards. High-Performance GPU Replaces Your CPU High-performance graphics cards not only boost your computer's performance, but also give you additional benefits, such as low temperatures and increased system stability. Better video quality A high-end graphics card features three times the power of your system's integrated graphics. This means you'll have more graphics processing power for smoother and more detailed video. Enhanced System Stability Compared to low-end CPUs and integrated graphics, the built-in graphics in high-end GPUs delivers more performance without generating much heat, keeping your system cooler and more stable. Deeper, more detailed games A high-end graphics card can support advanced features like advanced anti-aliasing, texture, and shadow details, all of which improve the quality and detail of 3D games. Lower power draw Compared to an integrated graphics card, a high-end graphics card has a lower power consumption rate for more efficient operation and cooler computing. Guaranteed compatibility Every high-end graphics card is optimized and tested for compatibility with your system before it's shipped from the factory. The GeForce GTX Titan X offers everything you want in a gaming desktop computer. If you're looking for a high-performance graphics card with incredible visual power, then this is the graphics card for you. Titan X is powered by the latest Kepler graphics architecture and two Titan

Editors' Notes If you have invested in a Corsair SSD recently, then there is a good chance that you want to make sure that you can enjoy it for the many years to come. Corsair SSD Toolbox is a lightweight piece of software designed to help you clean, secure delete data and optimize your volume to maintain its peak performance. Includes an intuitive, yet old-school interface Following a fast and forthright setup, you are welcomed by a rather rugged and outdated interface. Then again, since the GUI is designed as a dashboard, you are unlikely to encounter any issues while navigating and accessing the desired function. As you probably expected, the tool displays general information about the selected drive, including but not limited to the model number, serial number, firmware version, drive size, ATA version, temperature, the total host reads and writes as well as the supported features. Moreover, the app enables you to find out about the new releases and make sure
