Photoshop Elements is a free download (Windows, macOS, and Linux versions available). It is provided as a software package and can be installed directly on a computer or through a license purchased online. You will need to install Photoshop Elements manually (not through the Adobe Creative Cloud); however, this guide will help walk you through the process. This guide is for Mac users. If you are a Windows user, we have a separate guide here. Installing Photoshop Elements on macOS Use this guide as a reference when you attempt to install Photoshop Elements onto your macOS computer. Prerequisites Make sure your macOS (or Windows) computer meets the following requirements: A macOS 10.10 or later (Mojave) or macOS 10.9 or later (High Sierra) is required. For 64-bit operating systems, you must install macOS Catalina 10.15 or macOS 10.14 Mojave. Disk space of at least 100GB should be available on your computer. Step 1 - Download the Photoshop Elements installer You will need to download and install the latest Photoshop Elements installer onto your macOS computer. Download Photoshop Elements for macOS from Adobe. Open the installer and follow the on-screen instructions. You will be asked if you want to install the program using a license code or a serial number. License codes allow you to download the program a few times for free, but only the first time you run the program. Serial numbers allow you to freely install the program without having to use a license code. When you have finished installing Photoshop Elements onto your computer, you will be prompted to restart your computer. Step 2 - Add Photoshop Elements to the Launchpad At the bottom of the Launchpad app, click the + sign to add a new application. In the Add App window, enter the name "Photoshop Elements" in the Name field, and then click OK. You will need to give Photoshop Elements a place in the Launchpad for you to access from macOS. To do so, click the folder icon (the folder). Double-click the Photoshop folder to open it. In the dialog box, select the Application Support folder in the left-hand pane and then click the Choose button in the upper-right corner. From the Choose a folder dialog box, navigate to the location where you downloaded Photoshop Elements to and select it. You have now added Photoshop Elements to the Launch a681f4349e
