EDIT: error read this A: Actually in your \$.ajax({}), you are using some characters wrong. Look at what you have (and how it is properly used): \$.ajax({ url: link, type: "POST", data: "imgs="+myImg.attr("src"), success: function(data) { \$('').attr('src', data).appendTo('#div'); } }); Notice the value of data you are passing, is incorrect. Look at the value: data: "imgs="+myImg.attr("src") It is a string (or a string literal), this should be: data: { imgs: myImg.attr("src") } Notice the difference between the two. One is a string, the other is an object, which is expected to be written like this: data: { imgs: myImg.attr("src") } The string and object should be written this way (and thanks to @lonesomeday for pointing it out): data: { imgs: myImg.attr("src") } Furthermore you are using syntax like data: "imgs="+myImg.attr("src"). No. Look at the jQuery ajax documentation for the data property. data: { imgs: myImg.attr("src") } Notice how imgs is a key, and it's value is myImg.attr("src"). Here is the correct code: \$.ajax({ url: link, type: "POST", data: { imgs: myImg.attr("src") }, success: function(data) { \$('').attr('src', data).appendTo('#div'); } }); You can find the documentation, with examples here: [e79caf774b](#)
