# Warhammer Legends Of The Old West Showdown Pdf

the hand of malaga is now a blight on the soil of the west. the land is barren and void of life, the crops have been burned and the cattle killed. the only exception to this are the trolls, who have survived the night after the warriors of the empire has been slaughtered. they have abandoned their hard-earned homes and left for parts unknown, hoping that the war will end so they can return home. however, these trolls are a different breed than the ones that populated the west for hundreds of years. they are a different species. their skin is rough and thick, their horns heavy and their strength legendary. they are the trolls of the old west and their spirits have been jaded by the mistreatment they have suffered at the hands of the empire. many have had their fortunes stolen from them by empire or the bandits that have overrun the west. many have returned to their homelands only to find that they have no homelands left. many folk have left for foreign lands, but for those who have remained it is a time of freedom, a time to rule their own destiny. the people of the western plains are no longer slaves. the woman and the children of the west are free to do as they please. there are no more taxes or tributes. there is no more imperial rule. the empire has been destroyed and is no more. the few who remain are the remnants of a mighty and mighty powerful empire that has spanned the western continents. the empire has never been seen to be defeated. the people of the plains have never been as free as they are now. the empire will rise again. and when it does, it will be even more powerful than it was before. an empire reborn. a beast that will rule the western plains. a nation of warriors that shall rule the land. the empire will rise again.

---

Should you be able to secure enough resources and haven't entirely rushed your initial setup, the next thing you can start to do with them is building the Hospital. It's very much the hub of the game, and the benefits you'll gain by choosing to create the Hospital very quickly becomes apparent. The Hospital itself is needed to heal your dudes, but the Clinic and the Morgue go further to give you immediate benefits if you properly place them. The Clinic is not a freebie, though. It is an additional VP if you've first placed the Hospital, but it also gives you resources to build new buildings at a later date. It's the lesser of two evils if you play from your initial picks; if you haven't placed the Hospital and you want a Clinic in your starting hand, you're screwed as you'll lose the VP from the Hospital and get a draw. The Morgue, however, is much better than it looks. It gives you another valuable resource immediately, a missing person marker, which can be used to speed up the game, as well as a key location for other buildings in a later phase. So, the locations you place and the order in which you build can be tweaked, if necessary, to get the best return on investment. I had played the Western before, so I knew the structure of play in the game. I did have an approach, however, that seemed to work best. I placed the Morgue early, the Clinic near it, a combined Clinic/Morgue, and finally the Sheriff's Office. Unfortunately, the above is based on the assumption that you'll have no prior starting hand markers, but the general idea of building the Hospital early on and the Signpost near it to speed up the game is generally sound. 5ec8ef588b
