LaCie Genie Timeline makes automatic backups easy for anyone. Just choose how often and what to back up. Restoring files is a snap, and the system will keep it organized and straight-forward. What's new in this version: 1.03.0.0: Fixed crash that happened while working with large volumes. 1.02.0.1: Fixed a crash that occurred when running more than 1 jobs at the same time. 1.02.0.0: Added the ability to save settings on a per user basis. This means that the back up program will now remember your settings for future use. To configure the settings, please start the program and go to the Settings menu. You will then be able to save your backup settings. 1.01.0.0: Added a new preferences page in the Settings menu, allowing users to customize the program and make it their own. This includes the ability to change the interface language and the default browser. 1.00.0.0: A few minor bug fixes. 1.00.0.0: Initial release The LaCie portable backup software allows you to back up your files to a variety of portable backup devices, or to a network drive on your computer. The software's simple-to-use interface allows you to easily browse to folders, select files and complete your backup. The backup process works in the background so that you can easily continue working without having to worry about your backup taking too much time to complete. Using LaCie backup software allows you to protect your files

---

from loss or corruption, ensuring that you never have to worry about losing important documents, photos, passwords or other files and folders on your computer. Managing your backup files is easy, thanks to the software's user-friendly interface. You can choose to create a backup at the time that you create a folder, at scheduled time intervals, or you can configure the program to back up a folder or drive whenever you insert a removable media. The program allows you to choose a backup location from a list of available removable drives or portable backup devices, and then automatically starts your backup at the specified time. LaCie portable backup software uses easy to read, easy to understand messages to alert you to new files, folders or changes. A few minor bug fixes. Designed to help you protect your files, this software lets you create and maintain backup copies of important files. Just make sure that

### **What's New In LaCie Genie Timeline?**

This app is designed to be used for automatic back up. No matter how much data you store on your computer, your backup will never stop - with LaCie Genie Timeline, you can restore files, folders, or your entire system in case of disasters. --- What's New --- - New Graphical interface - When an application or a process is asking to restart, the application will be re-launched without stopping the current process. - Restore your application from your backups without starting them. - To speed up the re-launch, the

---

app will use fewer RAM memory. - A configuration file, config.ini, have been added to allow settings changes. - LaCie Genie Timeline is an application and therefore cannot be installed by itself. It will automatically integrate with the most common backup software: Time Machine, Carbon Copy Cloner, mCopy, etc. - LaCie Genie Timeline and Time Machine offer different features: - LaCie Genie Timeline uses the Time Machine or Carbon Copy Cloner to recover your backup files while Time Machine only uses the Time Machine service. - LaCie Genie Timeline stores backup files on the desktop and Time Machine stores them in the Time Machine folder. - The official support and the resolution of issues for the application will be on the support page. - Bug fixes. When you use the Genius you will always have your data backed up. Just write your documents, press the Genius button and your files will be encrypted and stored on your PC. The Genius automatically creates a folder for your backups, no user intervention is necessary. With Genius you are ensured that you can continue using your PC without missing a single file or folder, thanks to the on-screen display indicating where the encrypted file is located. Genius stores the files in the cloud, which makes the recovery of your backed up files quick and easy. Genius allows you to create multiple backups and has a restore function for each individual backup. The Genius screen display automatically copies the files in your folder to a cloud folder so that they are always available, even if the Genius is turned off or if your PC crashes. The Genius app is a free download. Main
